

NoRugMoon (NRM)

A Solana-Based Community Coin Fighting Against Rug Pulls

1. Introduction

The **Solana blockchain** has revolutionized the crypto landscape with its lightning-fast transaction speeds, near-zero fees, and unmatched scalability. It has become a hotbed for rapid innovation—fueling everything from DeFi protocols to experimental tokens. However, this very speed and accessibility have also opened the door to a darker side of the ecosystem: **rug pulls**. These deceptive schemes, where project founders disappear with investor funds, have left countless communities disillusioned, financially hurt, and skeptical of new launches.

Enter **NoRugMoon (NRM)**, a Solana-based coin born out of the frustration with scams and the desire to restore trust in crypto. We're not just launching a token—we're building a movement. NoRugMoon stands as a rallying cry for transparency, fairness, and community-driven growth. It's a bold rejection of manipulation and greed, and a celebration of decentralized values. With every transaction, every vote, and every community initiative, NRM proves that it's possible to create something fun, exciting, and trustworthy in the wild world of crypto.

We believe the moon is still within reach, but this time, we're taking the whole community with us. **No dev disappearances. No hidden wallets. No rugs—just rocket fuel powered by trust and transparency.**

Our Motto: To the moon, with no rugs in sight.

2. Vision and Purpose

Vision

To establish a Solana-based coin where trust is the foundation, not the exception. NoRugMoon (NRM) seeks to redefine the Solana-based coin narrative by championing community ownership, transparency, and anti-rug mechanisms—setting a new standard for integrity in crypto.

Purpose

- Empower the community to shape the project's future
- Eradicate rug-pull risks with locked liquidity, immutable contracts, and revoked authorities
- Create a token that's as entertaining as it is dependable, leveraging Solana's high-performance blockchain

3. Why Solana and Moonshot?

Solana: The Ideal Blockchain

Solana powers NoRugMoon with its unmatched capabilities:

- **Blazing Speed:** Transactions confirm in under a second, keeping energy high and interactions seamless
- **Low Fees:** Gas costs stay under \$0.01, making NRM accessible to all
- **Scalability:** Solana can process thousands of transactions per second—perfect for fast-moving token communities
- **Ecosystem:** A vibrant community and developer network position Solana as the prime hub for next-gen tokens

Moonshot: The Ultimate Launchpad

Moonshot is the go-to platform for launching trending tokens—and the ideal partner for NRM’s fair launch:

- **Fair Launch Guarantee:** No presales, no insider deals—everyone gets a fair shot at the 1 billion token supply
- **Immutable and Audited:** Ownership is renounced, and contracts are audited for security
- **Liquidity Migration:** Upon reaching 432 SOL (\$51.9K) or 25 ETH (\$45.0K) market cap, all remaining tokens and liquidity migrate to a DEX (e.g., Meteora) and are locked forever
- **Earn Rewards:** Launching on Raydium via Moonshot enables lifelong LP rewards
- **Trending Potential:** Moonshot’s Enhanced Token Info maximizes visibility on DEX tools like DEX Screener

By leveraging Solana’s tech and Moonshot’s fair-launch model, NoRugMoon ensures transparency, equity, and community-first momentum—no insider dumps, just grassroots power.

4. The NoRugMoon Movement

Theme: The Anti-Rug Revolution

Rug pulls are the plague of the crypto world. Developers hype a project, pull the liquidity, and vanish. NoRugMoon flips that script. Our bold promise: **no rugs, only solid ground**. Our mascot—a shaggy rug with a bold “X” across it—represents our stand against scams and empty promises.

Community First, Always

NRM is community-owned and operated. From governance to marketing, every decision lies in your hands. We’re not just launching a Solana-based coin—we’re igniting a movement against deception and for radical transparency.

5. Tokenomics

Token Overview

- **Name:** NoRugMoon

- **Symbol:** NRM
- **Total Supply:** 1,000,000,000 (1 billion)
- **Blockchain:** Solana
- **Launch Platform:** Moonshot

Allocation

- **Fair Launch (100%):** All tokens distributed through Moonshot's fair launch—no presales, no dev allocations

Anti-Rug Protections

- **Locked Liquidity:** Verifiably secured and locked via Moonshot
- **Immutable Contracts:** Mint and freeze authorities revoked—supply is fixed and tamper-proof
- **Full Transparency:** All transactions, locks, and addresses are publicly auditable on-chain
- **Audited Security:** NRM uses Moonshot's fully audited smart contracts from day one

Fee Structure

- **Zero Tax:** No buy/sell fees. What you buy is what you own—clean and simple.

6. Launch on Moonshot: How It Works

NRM launches on Moonshot with a fully transparent and community-friendly structure:

- **Contribution Phase:** An open pool allows anyone to contribute SOL—no bots, no whales, just fair access
- **Token Distribution:** NRM is distributed proportionally based on contribution
- **Liquidity Migration:** Once the 432 SOL (\$51.9K) or 25 ETH (\$45.0K) cap is reached, all remaining liquidity migrates to a DEX like Meteora, permanently locked
- **Trading Freedom:** Trade NRM freely while earning LP rewards for life via Meteora

This launch model eliminates presale abuse, builds community trust, and aligns with our anti-rug mission.

7. Roadmap

Phase 1: Launch (Q2 2025)

- Launch on Moonshot with audited, immutable contracts
- Launch community channels on X, website, Telegram

Phase 2: Growth (Q3 2025)

- Airdrops and meme contests funded by the community treasury
- Listings on major Solana DEXs (e.g., Raydium, Meteora)
- Boost visibility through viral content, and NFTs

Phase 3: Expansion (Q4 2025)

- Partner with anti-scam initiatives and other Solana projects
- Roll out utilities voted on by the community (e.g., staking, charity events)
- Begin exploring CEX listings

8. Risks and Disclaimer

While NRM is designed with anti-rug protections, the crypto market is volatile by nature. Solana-based coins, like all digital assets, are subject to market hype and fluctuation. Never invest more than you can afford to lose.

NRM is a community-driven experiment and not a registered security or guaranteed investment. Always do your own research (DYOR).

9. Join the Anti-Rug Revolution

NoRugMoon is more than just a Solana-based coin—it's a stand against the scams and shady dealings of crypto's past. We're here to show that a better way is possible.

- **X (Twitter):** [@norugmoon](https://twitter.com/norugmoon)
- **Telegram:** <https://t.me/norugmoon>
- **Website:** <https://norugmoon.github.io/norugmoon/>

Grab your SOL, join the launch on Moonshot, and let's take this coin to the moon—no rugs, just real community power.

To the moon, together!
